OBJECTIVE

An self-taught programmer wants to contribute to Linux someday

EDUCATION

Bachelor of Infomation and Technology, University of Engineering and Technology (UET)   Expected 2024

SKILLS

English	Be able to read any technical documents
Data structure and Algorithm	Solved 100 problem in leetcode
Web Development	Spring Framwork, Django
Web scrapping	Python, requests, beautifulsoup
Using devtools	Git/Github, Linux Command, Chrome devtools
Decent knowledge	Java, Python
Basic understanding	HTML, CSS, Javascript, SQL, Bash, C, Rust.

EXPERIENCE

Intern   Aug 2022 - Oct 2022
I3   *Thanh Xuân, Hà Nội*

- Improve HTML, CSS, JS skills
- Learn about jquery, how ajax works

PROJECTS

Open in BlackBox Build a project that opens BlackBox(A terminal emulator) directly from FileExplorer context menu. It's a small but helpful project for Linux community

Blog A personal blog build with Ruby and Jekyll

Dictionary A full-feature Dictionary app, build with JavaFX, supports Google Translate API, local dictionary in sqlite database, text to speech API...

Discord Bot A discord bot to play youtube music and analysis some stuff.

Dino Dino game make with SDL2

Schedule A commandline app auto make schedule by scrapping school website

EXTRA-CURRICULAR ACTIVITIES

- Learning new tech stacks, enjoy coding small tools and learning new language (Typescript, Rust, Deno..)
- Reading technical books (Java focused).
- I use Arch, btw
